Forecast for Saturday 31 Aug 2024

Weather: Sunny at first, with early mist and fog in the valleys clearing by mid-morning. Then cloud increases, although bright or sunny spells will still occur. Cloudy this evening, with a chance of a little drizzle developing across eastern areas by late evening.

Chance of cloud-free hill tops above 600m: Mainly 100%, although temporarily falling to 80% this morning as fog lifts, and then 80% after dark.

Low cloud and visibility: Locally very poor visibility at first in the valleys due to fog patches. As this fog lifts, ribbons of cloud may form between 400 and 500m for a few hours early this morning. This cloud clears by mid-morning leaving widely good visibilities, albeit distant hills and landmarks may appear somewhat hazy.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Fog patches possible in the valleys this morning, but will clear by 9-10am. A windier day than on Friday with the wind creating a cool feel on the summits, so it's worth taking an extra layer if heading to the tops.

Recent rainfall: measured at Neuadd: altitude 353m

02:00 on Sat 31 Aug 2024	0mm	0.2mm	2.8mm

Forecast for Sunday 01 Sep 2024

Weather: Sunday will be a cloudier and more humid day with widespread morning hill fog. Patchy drizzle is likely through the morning as well. Through the afternoon becoming dry with warm bright or sunny spells developing. Lighter winds.

Maximum wind: Northeast 20mph gusts 30mph first thing becoming southerly 10-15 mph.

Chance of cloud-free hill tops 600m: 20% becoming 90%.

Low cloud and visibility: Extensive cloud above 400-500m through the morning. Becoming patchy above 700m by mid-afternoon. Poor visibility within the cloud but otherwise generally good visibility though locally poor in drizzle.

Temperature: **Valleys:** Plus 12 Celsius rising to plus 24 Celsius.
At 600m: Plus 12 Celsius rising to plus 18 Celsius.
Freezing level: Well above the summits.
